

IOS LED Incapacitator named by TIME Magazine as one of the Best Inventions of 2007!

LEDI Delivered to DHS

LEDI™ Technology provides superior performance:

LEDI, Light Emitting Diode-Incapacitator, uses high intensity LEDs, which emit a proprietary combination of wavelengths to flashblind and disorient the target. This proven effect interferes with a subject's ability to continue ongoing behavior. Operational range is 0 to 50 feet—safe at point blank range.

- Human effectiveness proven by independent tests
- Flexibility to address different law enforcement and military needs
- Can function as ultra bright conventional flashlight
- Flexible design that will support multiple missions with other form factors
- Innovative light source allows smaller and brighter devices

FEATURES & BENEFITS

- ***Faster:*** Use immediately with the flick of a switch in any situation
- ***Better:*** No projectiles, cleanup or fire damage
- ***Cheaper:*** Reusable device with rechargeable batteries
- ***Familiar:*** Similar in size to existing flashlights
Contains high/low intensity white light

APPLICATIONS

- Riot Control/Crowd Dispersal
- Prison/Jail/Other Custodial Situations
- Special Enforcement Bureau (SWAT)
- Anti-hijacking
- Hail & Warn/Checkpoints/Barricade
- Counter-Sniper
- Avian Denial
